

Appl. No. 09/828,856  
Amdt. dated May 19, 2005  
Reply to Office action of February 24, 2005

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (original): A server for a network, the server enabling a user at a station to scan a  
5 document, the station comprising:  
a computer connected to the network;  
a browser installed on the computer to enable the user to browse the network; and  
a scanner in communication with the computer;  
the server comprising:  
10 a database of scanner drivers;  
a driver selection system that enables the user to select a driver for the scanner from  
the database of scanner drivers; and  
a delivery system that transfers a selected driver to the computer and causes the  
computer to execute the driver;  
15 wherein the user uses the browser and the driver selection system to select a driver  
for the scanner, the delivery system sends the driver to the computer, the  
computer executes the driver, the driver uses the scanner to scan a document,  
and scanning data corresponding to the document is saved in a predetermined  
location.  
20  
2 (original): The server of claim 1 further comprising a destination selection system that  
enables the user to use the browser to select the predetermined location for saving  
the scanning data.  
25 3 (original): The server of claim 2 wherein the predetermined location comprises a  
universal resource locator (URL) or an electronic mail (e-mail) account address.

Appl. No. 09/828,856

- 4 (original): The server of claim 2 wherein the computer further comprises a media for storing data, and the predetermined location specifies that the media be used to save the scanning data.
- 5 5 (original): The server of claim 1 further comprising a login system for establishing an identity of the user; wherein prior to using the driver selection system, the user first uses the login system to log into the server computer.
- 6 (original): The server of claim 5 wherein the login system correlates the identity of the user with an account on the server, and the scanning data is saved in the account.
- 10
- 7 (original): The server of claim 6 wherein the account is an e-mail account.
- 8 (original): The server of claim 6 further comprising a viewing system for enabling the user to view the scanning data saved in the account.
- 15
- 9 (original): The server of claim 1 wherein the selected driver is transferred to the computer in a self-extracting executable file format.
- 10 (original): The server of claim 1 wherein the driver is removed from the computer after the scanning data is saved in the predetermined location.
- 20
- 11 (new): The server of claim 1 wherein the server further comprises a network connection, and the server communicates with the station through the network.
- 25
